InVaKaS Workshop

Tuesday, 21.03.2023 | hybrid event

Innovation potential for valorized cascade use of by-products from juice production

One-week workshop with experts from Brazil and Germany

Fruit production is resource-intensive and therefore calls urgently for more sustainable practices, for instance, through the circular use of biomass. The residues of fruits hold potential for further use and valorization e.g. as feed for livestock, for the extraction of antioxidants, as a nutrient for enzyme or biogas production or as a source of dietary fiber and specialty chemicals.

The one week "InVaKaS" workshop with experts from Brazil and Germany, intends to map the value chain and to develop new research ideas for valorization and cascade use contributing to the sustainability transition of value chains.

- The workshop takes place from **20.3. to 26.3.2023** in Bahia, Brazil and aims to engage various stakeholders along the value chain to elaborate **new project ideas**.
- **Programm**
 - 20.3. Get together
 - 21.3. Valorization of fruit biomass - hybrid event
 - 22.3. Excursion 1 | Idea development
 - 23.3. Excursion 2 and 3
 - 24.3. Ideation session
 - 25.3. Project development
 - 26.3. Farewell
- Tuesday, **21.03.2023** will be organized as a **hybrid event** and welcomes every person interested in this topic. The workshop language will be English.

Valorization of Fruit Biomass Program - hybrid event

Tuesday, 21.03.2023 | Salvador de Bahia, Brazil

time

local | Germany

09:00 13:00	Welcome address
09:40 13:40	Panel 1: funding opportunities
10:30 14:30	Break
10:50 14:50	Panel 2: start-up companies
12:00 16:00	Lunch Break
13:00 17:00	Panel 3: research projects I
14:10 18:10	Break
14:30 18:30	Panel 4: research projects II
16:00 20:00	End of hybrid event
